

The Proud Father

Hi everyone, guess what? I'm a Dad!... And they just don't make doors big enough to get my head through nowadays.

We have a little girl called Brooke, you can see her here 'Horse Whispering' to our 14 year old pony, called 'Shack' (Isn't she CUTE?!).

On her days in the clinic, she sleeps on top of the filing cabinet in the office. Every business should have a manager... Brooke is ours!

Finally... You Can Be The Vet!

How to see if your pet's teeth are killing them.
Let's do a home assessment NOW!

Go and get your pet right now...
Go on I'm waiting..... We don't go on until you have them in your lap...

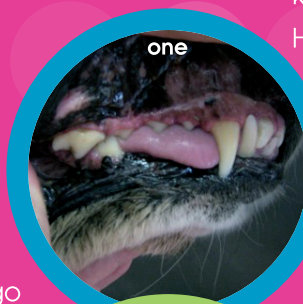

OK, now lift up their lip and have a look at their teeth and gums.

If their teeth look like this (No.1)...
Congratulations, keep doing whatever you are doing.

If they look like this (No. 2)... I suggest you get them cleaned before they look like this (No. 3)...

Why? Because it can be causing kidney damage.

Bad breath is caused by small infections in the gums because of plaque buildup (same as in humans). The body is consistently fighting off these infections and it actually causes kidney and liver

damage. Over years this is directly linked with kidney failure.

How to stop plaque building up:

1. Feed Eukanuba dry dog food
2. When feeding raw meat, DO NOT CUT IT UP. LET THEM CHEW ON IT.
3. Give them something to chew on (this helps wear away the plaque)
4. Brush their teeth

Generally small dogs and cats get plaque because they get so much soft food.

For March only, if you are not sure about your dogs teeth, book in for a FREE nurse checkup.

We aren't going to talk you into something you don't need. We just discuss options... You decide.

How To Train Your Dog In 5 Hours

The first Naughty Dog School was such a huge success that the 2nd one is already booked out and underway. Bob Venning, a dog behaviorist, runs this class and the feedback has been unbelievable.

" Before I went to the Naughty Dog School, Sunny was running away, and would not come when we called him so we couldn't let him off the lead. He was barking, chewing his bed, digging up the garden and generally destructive at home.

After the school he comes to me when I call him, walks with me on the lead, will heal, stay for long periods and we are able to take him for a walk without a lead."

- Elaine and William Turnbull
Falcon Way, Tweed Heads South.

This 5 hour course is for those of you who want advanced obedience training:

- Sitting outside a store while you go inside and being there when you get back
- Coming to your call regardless of the situation (eg at the park with 100 other dogs running around)
- Not eating scraps unless you ok it... etc.

Nurse Consults

You can now book in to see a fully trained nurse if your concern is about diet, fleas, behavioral problems etc.

The benefit to you is: If a vet doesn't need to see you, it will be lighter on your pocket, and **THE ADVICE YOU WILL BE GETTING IS STILL FROM A TRAINED PROFESSIONAL.**

This means we stand behind the advice we give. If you aren't happy, we will continue to work with you until you are.
